Network Cable Tester RJ45/RJ11/BNC 8 leds (5584651)

With the multi cable tester you can easily test a variety of network cables and diagnose cable problems. Automatically runs all tests and checks of continuity, open, shorted and crossed wire pairs.

A cable tester is an indispensable tool for networking installation and maintenance. This compact tester is designed specifically for on-site working staff. It can be used in testing network and telephone type cables.

Features:

- It can be used in networking installation cables (including UTP, STP, and coaxial) and in telephone cables.
- This tester can test continuity RJ45, RJ11, and BNC Cable.
- It can satisfy the majority of telephone and computer network testing requirements.
- Its design gives the user the convenience for the near-end test and the far-end test after installation.
