### **GigaSPEED XL MGS400 Jacks - Category 6**

The MGS400 Information Outlet represents the latest in a series of industry leading SYSTIMAX Labs innovations in the field of high-speed LAN connectors. SYSTIMAX Labs pioneered the industry's first Category 5 outlet in the early 1990s, the first Category 5e outlet in 1996, and the very first modular outlet certified to support Category 6 applications with the introduction of the GigaSPEED MGS200 Outlet in 1997, and MGS300 Outlet in 2000. Built upon this phenomenal success and supported by 18 patents, the MGS400 Outlet features proprietary cross-talk cancellation techniques for superior near-end cross-talk (NEXT & PSNEXT) performance that provides unmatched throughput performance when installed as part of a complete GigaSPEED XL channel.

The MGS400 Information Outlet is an integral part of the GigaSPEED XL Solution portfolio. The GigaSPEED XL Solution offers guaranteed margins over the minimum Category 6/Class E requirements even in worst-case configurations with up to six connections.
